

# KARTING UNLIMITED POSSIBILITIES

1

## AMAZING EXPERIENCE

Even Formula One drivers drive karting often as part of their training. The speeds are up to 130 km/h and the drivers are challenged with rapid events. Average heart beat is about 180 in a race. It's for all ages. Come and challenge yourself!

2

## EQUAL OPPORTUNITY

Karting is a low-cost form of motorsport. It teaches you the fundamentals which apply in any motorsport: formula, rally, rallycross, drifting, you name it. In X30 you can be competitive with standard equipment and save in costs.

3

## SAFETY AND EDUCATION

Young drivers learn physics and develop their reactions and car handling. The experience reduces risks in real-life traffic and focuses energy on something positive. Long-term working is also required to become a successful racing driver.
